

Research & Evaluation Consultant

Looking for a new opportunity then ... Join me for a conversation!

Established in 2006, Innovas has been growing rapidly over the last few years. We are now looking for a person to join our team to support this growth, add to our capacity and capability, and lead on developing new opportunities.

We want someone with a background in research and evaluation who has worked with and understands the public sector and who brings practical experience in these fields and a willingness to develop new skills and expand their horizons. An understanding of OD & economic development would be an advantage, but this is less critical.

Yes - we are looking for someone to support delivery; but critically, we are looking for someone to help grow and build the business, and take responsibility for work strands.

We are Cheshire based and working nationally. We have always worked virtually and this last year has of course been no exception, so where you are based is not critical although North West is preferred, as we get together on a regular basis face-2-face and virtually.

Looking forward to having some interesting and exciting conversations soon.
